Authorisation requirements

Grundläggande behörighet för högskolestudier. Särskild behörighet motsvarande för sjuksköterskeutbildning. Basic eligibility for university studies. Special authorization corresponding to nursing education.

Course description

Clinical training for incoming exchange students in emergency care.

Learning goals

Knowledge and understanding

After completing the course, the student should be able to:

- Summarize patient needs in relation to demographic factors.
- Explain how patient care should be organized, coordinated, and exercise leadership in interprofessional teams within primary care.

Competence and skills

After completing the course, the student should be able to:

- Independently propose and evaluate nursing interventions to achieve safe care based on evidence-based knowledge.
- Demonstrate the ability to independently teach and support patient self-care.

Judgment and approach

After completing the course, the student should be able to:

- Reflect on and argue about equal treatment and power structures in open health care.
- Demonstrate the ability to reflect on one's own and the patient's learning.
- Evaluate one's own and other professionals' roles in teamwork centered around the patient.

Examination

- Examination of clinical training: Clinical training in Primary Care. (Nursing 6 credits). Grades: Fail (U) or Pass (G).
- Mandatory components related to the examination: Seminar during clinical training.
